

SAFETY SEMINARS AND EDUCATIONAL PROGRAMS

Sharing Our Expertise

Our commitment to our customers mandates that we maintain the most qualified technical staff in the region in order to help our customers improve their processes and procedures and reduce their total MROP procurement. Our Salesforce is dedicated to providing you with productivity improvements and lower cost solutions. Our Safety Seminars and Environmental Programs help you create the safest working environment possible and help you to be aware of current environmental regulations.

For decades, our field service technicians have provided expert, technical assistance to the area industry. Through our [technical support services](#) we partner with our suppliers to add value to our customers operations and to help assure them a competitive advantage.

MSI's in-plant safety seminars are designed to be conducted within a 45-60 minute time frame or customized to the end users' needs. The emphasis in all safety seminars is on improving the safety process as it applies to the end users' specific applications.

You may coordinate all safety seminars with your Sales Representative or contact Jeff Boterf by E-mail or phone at 260-484-8566.

>> Aerosol EPA Compliance Survey - presented by Osborn

*This seminar includes a plant survey and inspection of all aerosol products used for compliance with applicable laws. This survey can also include seminars for the safe use of the aerosol products and health of associates.

>> Lifting Devices Inspection - presented by Lift-All

*Through instruction, video, and demonstration, this seminar covers industrial sling design, application, and safe use.
